

The Right Information When It Matters Most

FACT SHEET

- ◆ The US Department of Health and Human Services estimates that \$140 billion per year could be saved through improved care and reduced duplication of medical tests.
- ◆ According to the National Congress on Pre-Symptom Medicine, regular preventive care could reduce projected U.S. health-care costs by 50 percent over the next 10 years.
- ◆ It is that an estimated 98,000 Americans die each year as a result of preventable medical errors.
- ◆ Parents, baby boomers, caregivers, patients and seniors who know about connected; interoperable health care systems recognize their benefits. Roughly 70 percent reported that they would use an Electronic Medical Device.
- ◆ Astonishingly, there are 125 million chronically ill people of all ages in the United States. This is over 42% of the US population.
- ◆ It is estimated that there will be 157 million chronically ill people by the year 2020. Family caregiver issues go well beyond the "frail elderly," despite the large percentage increase in that population.

By providing the CARE Medical History Bracelet to your patients you will be doing your patients a great service. Empowering patients by giving them access to their crucial health information, this will also enable them to be more self-aware. You will reduce healthcare costs by reducing duplication of tests and improving continuity of care. When you give your patients a CARE Medical History Bracelet with software customized specifically for you, your patients will have access to their patient portal.

"Starting today CARE will always be at hand."
